ATHERIS LABS

ATHERIS LABS — INTERNAL DOCUMENTATION

SDR *Onboarding* Kit

100% Commission-Based Outbound Sales

Everything you need to represent ATHERIS LABS in the market, qualify the right buyers, and start earning commission on every closed project — from your very first conversation.

10–20%	$500–$4,500	Uncapped
PROGRESSIVE COMMISSION ON EVERY CLOSED DEAL	TYPICAL PROJECT VALUE RANGE	NO CEILING ON VOLUME OR EARNINGS

DOCUMENT	SDR Onboarding Kit	VERSION	1.0
AUDIENCE	Commission-based SDRs	CLASSIFICATION	Internal — Confidential
ENGAGEMENT	Independent contractor	OWNER	Atheris LABS · Sales

CONFIDENTIAL — FOR AUTHORISED ATHERIS LABS SALES PARTNERS ONLY · DO NOT DISTRIBUTE

01 — INTRODUCTION

Who we are & *what we sell*

Before you can sell Atheris LABS, you need to be able to describe it in one breath — accurately, confidently, without hype. This chapter gives you that.

The studio in one paragraph

Atheris LABS is a **software engineering studio**. We design, build and ship custom digital products for businesses: high-performance web applications, mobile apps, desktop software and the automation that ties them together. We are not a template shop and we are not a staffing marketplace — every engagement is scoped, engineered and delivered by our own team.

Our engineering core is deliberately modern and narrow: **Next.js** and **Node.js** on the application layer, **PostgreSQL** as the system of record, wrapped in a design practice that treats interface quality as a engineering discipline rather than decoration.

MISSION

We exist to give ambitious businesses the software that larger competitors already have — engineered to their actual process, delivered at a size and price they can act on. **You sell that mission, one business at a time.**

Areas of *expertise*

These are the four things you will be opening conversations about. Learn to name them plainly — a prospect recognises a studio that knows its own work.

01 · WEB

Web Applications & SaaS Platforms

Multi-tenant platforms, business dashboards, customer portals and business-critical internal tools — the products a company actually runs on.

NEXT.JS · REACT · NODE.JS · POSTGRESQL · MULTI-TENANT

02 · MOBILE

iOS & Android Mobile Apps

Two native platforms built for everyday use: smooth interfaces, careful performance, and guided publishing to the App Store and Google Play.

FLUTTER · REACT NATIVE · MOBILE-FIRST UI/UX · STORE PUBLISHING

03 · DESKTOP

Cross-Platform Business Software

Desktop software shaped around a company's internal process, running consistently on Windows, macOS and Linux.

ELECTRON · FLUTTER DESKTOP · WINDOWS · MACOS · LINUX

04 · MODERNIZATION

Modernization, Redesign & Cloud

We modernise what a business already runs: performance audits, architecture redesign, cloud migration and a launch that scales without drama.

PERFORMANCE AUDIT · CORE WEB VITALS · REST / GRAPHQL · SCALING

Workflow *automation*

Alongside products, we automate the manual work that quietly eats a team's week — quoting, onboarding, reporting, data entry between tools, notifications. This is often the **easiest first conversation to have**: the pain is concrete, the budget is small, and the proof of value is immediate. Many of our largest engagements started as a modest automation build.

WHAT MAKES US EASY TO SELL	WHAT YOU ARE COMPETING AGAINST
+ A real, verifiable portfolio — not promises	→ Freelancers who vanish mid-project
+ Founder-led delivery, so answers come fast	→ Agencies with agency pricing and agency delays
+ A defined price band prospects can act on	→ In-house hires a small business cannot justify
+ Short engagements, so decision cycles stay short	→ DIY website builders that hit a ceiling fast

Positioning in one line: a business gets the engineering quality of a senior product team, on a project it can actually approve — scoped, priced and delivered without the overhead of an agency.

02 — BUYER PERSONA

Who to target & *why they buy*

Outbound only pays when the list is right. Spend your hours on the four profiles below, and lead with the pain rather than the technology.

Four profiles *worth your time*

PROFILE A

Growing SMBs

Established small and mid-sized businesses with real revenue and real customers — but an online presence that no longer reflects their size. They feel the gap between how professional they are and how professional they look.

OUTDATED WEBSITE · MANUAL BACK-OFFICE · HIRING STALLED BY TOOLS

PROFILE B

Service Agencies

Marketing, consulting, logistics and creative agencies whose delivery depends on spreadsheets and inboxes. Their margin leaks into coordination work that should be software.

NO CLIENT PORTAL · MANUAL REPORTING · SCALING HEADCOUNT

PROFILE C

Startups

Founders with funding or traction and a product roadmap they cannot execute alone. They need senior engineering now, without the cost and delay of building a full team first.

MVP TO BUILD · NO CTO YET · INVESTOR DEADLINES

PROFILE D

E-commerce Stores

Online retailers outgrowing their platform: slow storefronts, checkout friction, inventory held together by hand. Every second of load time and every abandoned cart is measurable money.

SLOW STOREFRONT · CHECKOUT DROP-OFF · INVENTORY BY HAND

Decision-makers to *reach*

ROLE	WHAT KEEPS THEM UP	WHAT LANDS	AVOID
CEO	Growth, margin, and looking credible to their own market	Business outcome first — revenue, credibility, time back	Technology deep-dives
Founder	Speed to market and not wasting limited budget	Ship fast, prove it, iterate — a partner who moves at their pace	Long, rigid timelines
COO	Operational drag and teams doing work software should do	Efficiency, reliability, fewer manual steps, clear ownership	Vague promises of "digital transformation"

Key *pain points*

If a prospect describes any of these, you have a live conversation. Mirror their words back before you ever mention a solution.

- **An outdated or slow website** that undermines their credibility and loses them enquiries they never see.
- **Manual processes** — quoting, scheduling, reporting, data entry — that consume hours a day and invite errors.
- **Disconnected tools** that do not talk to each other, forcing staff to retype the same information.
- **No customer-facing portal**, so every request arrives by email and nothing has a status.
- **No mobile presence** for a business whose customers live on their phones.
- **Losing deals to better-presented competitors** with a stronger digital footprint.
- **Growth capped by headcount** — the only way to do more is to hire more, and that does not scale.

Qualify before *you invest*

GREEN FLAGS — PURSUE

- ✓ You are speaking to the decision-maker, or can be referred to them
- ✓ They describe a concrete problem, not a vague wish
- ✓ There is a real consequence to doing nothing
- ✓ They can approve a project in the $500–$4,500 band
- ✓ They have launched — or are ready to launch — within weeks

RED FLAGS — DISQUALIFY

- ✗ "Just curious" with no problem, budget or timeline
- ✗ Expecting a full internal team on retainer for a one-off fee
- ✗ Insisting on unpaid spec work or free proposals
- ✗ Requests that are illegal, deceptive or against platform policy
- ✗ No authority and no route to anyone who has it

DISCOVERY — FIVE QUESTIONS THAT DO THE WORK

What is the business problem, and what is it costing you? · What happens today, step by step? · What have you already tried? · If this were solved in six weeks, what would change for the business? · What would a result be worth to you?

Qualifying is not interrogation. Ask, listen, and write it down — a prospect who feels heard is a prospect who agrees to a call with the team.

03 — COMMISSION STRUCTURE

Progressive & *uncapped*

You are engaged as a commission-based independent contractor. The more you close, the higher your rate — with no ceiling on volume and no cap on earnings.

The *barème*

Your rate is set by your cumulative number of **paid clients**. It rises as you deliver, and it never falls.

TIER	PAID CLIENTS	YOUR COMMISSION	STANDING
T1	0 – 4	10.0 %	ENTRY
T2	5 – 9	12.5 %	ACCELERATOR
T3	10 – 19	15.0 %	SENIOR
T4	20 and above	20.0 %	ELITE

THE THREE COMMITMENTS THAT MATTER

Immediate payout — your commission is released as soon as the client's down payment is received. You do not wait for delivery to finish.
Uncapped — there is no maximum deal value and no maximum number of deals. Tier 4 applies to every deal from your twentieth onward.
Non-retroactive — your rate is locked in at the moment a deal is triggered. Climbing a tier can only ever increase what you earn going forward.

What a deal is *worth*

Commission is calculated on the full project value. These figures show your earnings at your entry rate and at the elite rate.

PROJECT VALUE	AT 10.0% (T1)	AT 20.0% (T4)	TYPICAL PROJECT
$500	$50	$100	Landing page · small fix
$1,500	$150	$300	Business site · integration
$2,500	$250	$500	E-commerce · dashboard
$4,500	$450	$900	Web app · app MVP · modernization

SCENARIO — STEADY STATE

Twenty clients at an average project value of **$2,250** is **$45,000** written. Across a blended 15–20% rate that is **$6,750 – $9,000** in commission — and everything above that is yours to keep earning, with no ceiling above it.

How a commission is *triggered*

01 **Quote accepted**

The prospect you sourced and qualified receives a formal quote from Atheris LABS.

02 **Down payment received**

The client's deposit lands. This is the single event that generates commission — not the conversation, not the quote alone.

03 **Rate snapshotted**

Your tier is recorded permanently against that deal at the rate in force on that day.

04 **Payout released**

Your commission is settled immediately, and the client moves to active with the delivery team.

READ THIS BEFORE YOUR FIRST DEAL

Attribution follows the CRM. A deal counts for you when the prospect is recorded under your name and reaches a signed quote with a down payment. Register every prospect you approach on the day you approach them — an unregistered conversation cannot be attributed to you later. Commission terms are fixed by your contractor agreement with Atheris LABS; where this kit and your agreement differ, the agreement governs.

Independent contractor status. You are self-employed. Commission is paid to you as a contractor, and you are responsible for your own tax filings and social contributions in your jurisdiction.

04 — OPERATIONAL PROCESS

Autonomy, with a *clear handoff*

We do not hand you a script. We hand you a market, a price envelope and a team that closes behind you. How you get from zero to a qualified conversation is yours.

FULL AUTONOMY

No rigid messaging templates are imposed on you. You choose your own channels, write your own outreach and run your own follow-up cadence. You know your market and your relationships better than any playbook could — we would rather have your voice than a template. We ask for one thing: that everything you send is accurate, professional and unmistakably on behalf of Atheris LABS.

Who owns *what*

YOU OWN	ATHERIS OWNS
+ Prospecting and building your own target list	→ Final pricing and the formal commercial proposal
+ First contact, in whatever channel you judge best	→ Technical scoping and delivery estimation
+ Qualification — fit, budget, authority, timing	→ Contracts, terms and signature
+ Discovery and framing the business problem	→ Engineering, design and quality assurance
+ Momentum, follow-up and CRM hygiene	→ Client onboarding and the delivery portal
+ The warm handoff to the closing team	→ Post-sale support and future expansion

Your operating *loop*

01 **Source**
Build and refresh your list. Your network, your market, your channels — the list is the work.

02 **Qualify**
Confirm need, authority, budget band and timing before you invest further. Disqualify quickly and without guilt.

03 **Reach out**
Your voice, your cadence. Lead with their problem, never with our technology.

04 **Discover**
Understand the business problem well enough that you could explain it to the delivery team yourself.

05 **Hand off**
Make a warm introduction to the internal closing team with your notes attached. Stay present, let them close.

06 **Track & iterate**
Log every touchpoint. Double down on the angle that earned replies; retire the one that did not.

Project pricing *envelope*

Every Atheris LABS engagement falls between **$500 and $4,500**. Share the range freely during qualification — it filters out mismatches early and builds trust. Never quote a final figure; that is the closing team's role.

BAND	TYPICAL ENGAGEMENTS	YOUR COMMISSION AT 10-20%
$500 - $1,000	Landing pages, brochure sites, performance fixes, small integrations	$50 - $200
$1,000 - $2,500	Multi-page business sites, e-commerce launches, dashboards, API work	$100 - $500
$2,500 - $4,500	Web apps and SaaS MVPs, mobile app MVPs, modernization and cloud migration	$250 - $900

THE HANDOFF

When a prospect is qualified and interested, you introduce them to the internal closing team with your discovery notes attached. From that point the commercial conversation — proposal, technical scoping, negotiation, contract — is handled internally, and your attribution stays recorded against the deal. Your job at the handoff is simple: **make the introduction warm, specific and timely**, and keep the prospect warm until the first internal call happens.

BOUNDARIES — NEVER CROSS THESE

Never quote a final price, discount or payment schedule · Never commit to a delivery date or scope on our behalf · Never sign, or imply you can sign, a contract · Never promise a capability the studio has not confirmed · Never speak on behalf of an existing client or reference confidential work without written approval. When in doubt, say you will confirm internally — it costs you nothing and protects the relationship.

05 — GOLDEN RULES

Standards, compliance & *getting started*

Your rate is earned on results. Your reputation — and your access to Atheris LABS — is earned on conduct. Both matter, and both are entirely in your hands.

Compliance *guidelines*

01 **Never misrepresent.** You are introducing a real engineering studio. Never invent clients, case studies, capabilities, metrics or affiliations.

02 **Never commit commercially.** Share the $500–$4,500 range, never a final figure. Pricing, scope and timelines are validated internally.

03 **Honour opt-outs immediately.** If someone asks to stop hearing from you, stop — and record it so they are never contacted again.

04 **Respect anti-spam and privacy law** in every market you prospect, including consent requirements, identification of sender and working opt-out.

05 **Handle data responsibly.** Prospect data is used for outreach only. Never resell it, share it externally or repurpose it for unrelated campaigns.

06 **Protect confidential information.** NDAs, client identities and internal material stay internal — including on social media.

07 **Respect attribution.** Never claim, overwrite or poach another SDR's registered prospect. Disputes go to Atheris LABS, never head-to-head.

08 **Acknowledge your status.** You act as an independent contractor, not as an employee, officer or authorised signatory of Atheris LABS.

Professionalism *standards*

STANDARD	WHAT GOOD LOOKS LIKE
Responsiveness	Every reply within one business day — including a "let me confirm that internally" holding reply
Tone	Plain, specific, respectful. No hype, no manufactured urgency, no pressure tactics
Accuracy	Every claim you make about Atheris LABS is one you could substantiate in writing
Record keeping	Every prospect and every touchpoint logged in the CRM on the day it happens
Follow-up	Persistent and polite. Most conversions come from the fourth or fifth contact, not the first
Discretion	No badmouthing competitors, no disclosing client names, no posting deal detail publicly

DO

- ✓ Lead with the prospect's business problem
- ✓ Qualify hard before you invest more time
- ✓ Use the price range openly to self-qualify buyers
- ✓ Write your own outreach in your own voice
- ✓ Register every prospect the day you approach them
- ✓ Ask the closing team for feedback after each handoff

DON'T

- ✗ Lead with frameworks, stacks or technical jargon
- ✗ Quote a final price or a delivery date
- ✗ Send unsolicited bulk blasts without an opt-out
- ✗ Chase prospects who have asked you to stop
- ✗ Overwrite or touch another SDR's prospects
- ✗ Promise anything the studio has not confirmed

Your first *seven days*

DAY 01 **Read this kit end to end.** Sign and return your contractor agreement, and confirm your commission terms.

DAY 02 **Get access.** Sign in to the CRM and learn how prospects move through the pipeline statuses.

DAY 03 **Build your first list.** Start with your own network and market — 50 targets, all decision-makers.

DAY 04 **Write your outreach.** Three angles, one per persona. Keep each under 90 words.

DAY 05 **Send your first 25.** Log every one. Notice which pain point earned the most replies.

DAY 06 **Run your first discovery.** Prepare five questions, listen twice as much as you speak.

DAY 07 **Review and iterate.** Keep the angle that worked, rewrite the one that did not, and double your volume.

ONGOING **Compound.** Every paid client moves you up the barème — the tenth deal pays half again as much as the first.

QUICK REFERENCE — TERMS	
Entry rate	**10.0%**
Elite rate (20+ clients)	**20.0%**
Project value band	**$500–$4,500**
Payout trigger	**Down payment**
Earnings ceiling	**None**

QUICK REFERENCE — ACTIONS	
Register a prospect	**Day of contact**
Reply to an active lead	**< 1 business day**
Hand off a qualified lead	**Warm intro + notes**
Opt-out received	**Act & log same day**
Anything uncertain	**Ask internally**

GETTING STARTED

Everything is in place. Now go *earn*.

You have the product, the price band, the commission ladder and a team that closes behind you. There is no territory to wait for and no permission to seek — the only variable left is the number of conversations you start. Build your list, write in your own voice, register every prospect, and hand off what you qualify.

Every client you bring in pays you immediately, moves you up the barème, and stays yours at the higher rate from then on. **Start today.**

Glossary

SDR
Sales Development Representative — you. Outbound prospecting and qualification.

OUTBOUND
Sales you initiate, as opposed to inbound enquiries that reach us.

QUALIFIED LEAD
A prospect with a real problem, authority, budget band and timing.

DOWN PAYMENT
The client deposit that formally triggers commission.

BARÈME
The progressive commission ladder — 10% to 20% by paid client count.

TIER
Your current commission rate band, locked per deal at trigger time.

WARM HANDOFF
Your introduction of a qualified prospect to the internal closing team.

INDEPENDENT CONTRACTOR
Your engagement status — self-employed, paid on commission.

Document control. SDR Onboarding Kit · Version 1.0 · Classification: Internal — Confidential. This kit is a working guide for Atheris LABS sales partners. Where it differs from your signed contractor agreement, the agreement governs. Report any inconsistency to Atheris LABS · Sales.
